

Cover letter

Dear Hiring Manager,

I am writing to express my interest in a Trainee or Junior Embryologist position with your team. I am currently completing my Master's degree in Reproductive Biotechnologies and will graduate soon. I am eager to begin my career in clinical embryology and contribute to your team. My academic training has provided me with a strong foundation in reproductive biology, embryology, and laboratory techniques. Although my practical experience is limited, I am highly motivated, a quick learner, and committed to continuously developing my technical skills under the guidance of experienced embryologists. I am passionate about embryology and understand the importance of precision, teamwork, and patient care in an IVF laboratory. I am willing to start from an entry-level position and work hard to gain the experience needed to become a skilled and reliable embryologist. My primary goal is to learn, grow professionally, and make a meaningful contribution to your team. I am also ready to join your team and start work as soon as possible. Thank you for considering my application. I would be grateful for the opportunity to discuss how my enthusiasm, dedication, and willingness to learn can benefit your team.

Sincerely,

Ahmed Amin

Bachelor in Genetics and Master of reproductive biotechnologies.
